

## Pediatric Inpatient Rehabilitation Home Team Stats 2020

Between 1/1/2019 and 12/31/2020, 80 patients were admitted to Acute Inpatient Pediatric Rehabilitation.

★ We treated the following:

### Age Groups

0 to 3 years: 14  
3 to 5 years: 6  
5 to 7 years: 2  
7 to 10 years: 7  
10 to 21 years: 51

### Ethnicities

White: 21  
Black: 33  
Hispanic: 19  
All others: 7

Number of patients	Impairment	% Discharged to Home
10	Stroke	100
23	Brain Dysfunction, Non-Traumatic	95.7
13	Brain Dysfunction, Traumatic	100
3	Neuro Conditions excluding Cerebral Palsy	66.7
3	Cerebral Palsy	100
6	Non-Traumatic Spinal Cord Dysfunction	100
3	Traumatic Spinal Cord Dysfunction	100
9	Orthopedic Conditions	88.9
1	Other Disabling Impairments	0
4	Major Multiple Trauma	100
3	Debility	100
2	Amputations, Arthritis and Cardiac	100
<b>Total</b>	<b>80</b>	<b>98.6%</b>

95.0% of our patients were discharged to the community compared to 87.1% in similar facilities and 89.9% nationwide.

Three of our patients were transferred back to the acute care hospital.

The Length of Stay (LOS) is the average number of days spent in the hospital.

JDCH	13.0 days
Similar Facilities	22.6 days
Nation	24.6 days

Our patients spent less time in the hospital and made more progress per day, during their rehab stay.

**Improvement:** On average, our patients were more independent with dressing, grooming, bathing, eating, getting in and out of the shower, on and off the toilet, controlling bladder and bowel, communicating, problem solving and socializing then patients who received therapy in similar facilities.

### Average Treatment Time

Standard Weekly Treatment Time	15 hours	JDCH Weekly Treatment Time	17.78
--------------------------------	----------	----------------------------	-------

94% of our patients received more than the minimum required treatment time, averaging an extra 2 hours and 48 minutes of therapy each week.
